DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7, 10-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Fowler.

Fowler discloses an enclosure (400) including first enclosure portion (402) and second enclosure portion (opposite portion 402), an opening, an interface joint (404, 405) including a plurality of crenellation or serration or serrated teeth, the first and second enclosure portions being at least substantially co-planar (406) proximate the interface joint (as best shown in Fig 4)(re claims 1-5, 7, 10-16)

Re claim 6, see col. 6, lines 6-11.

Allowable Subject Matter

Claims 8, 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2831

The following is an examiner's statement of reasons for allowance:

The limitation "at least one connector is disposed on said plate" in combination with other limitations present is neither taught nor disclosed in the prior art of record.

Response to Arguments

Applicant's arguments filed 10-26-04 have been fully considered but they are not persuasive.

Applicant argues (1) that none of the teaching of Fowler suggests co-planar proximate portions. With respect to (1) Fowler discloses the first and second enclosure portions being at least substantially co-planar (406) proximate the interface joint (404, 405).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
